SUBJECT INDEX

Acrylic acid
photoreactivity of chromium(III) and chromium(VI)–acrylic acid systems: polymerization *vs.* decarboxylation, 249
Actinometers
two wavelength-independent chemical actinometers which together cover the range 334 - 500 nm, 89
2-Adamantanone
pressure effects on the photocycloaddition of 2-adamantanone with fumaronitrile, 17
Alkanes
laser induced fluorescence studies of CN reactions with alkanes, alkenes and substituted aliphatic species, 177
Alkenes
kinetics of the gas phase reaction of chloride atoms with a series of alkenes, alkynes and aromatic species at 295 K, 167
laser induced fluorescence studies of CN reactions with alkanes, alkenes and substituted aliphatic species, 177
Alkynes
kinetics of the gas phase reaction of chloride atoms with a series of alkenes, alkynes and aromatic species at 295 K, 167
Alloxazines
photoreactivity of 6- and 9-methylalloxazines in the presence of acetic acid, 81
Amines
the reactions of OH radicals with toluene diisocyanate, toluenediamine and methylenedianiline under simulated atmospheric conditions, 195
Anilines
photoinduced electron transfer from *N,N*-dimethylaniline to chlorobenzene: the decomposition rate constant of the radical anion of chlorobenzene, 9
the reactions of OH radicals with toluene diisocyanate, toluenediamine and methylenedianiline under simulated atmospheric conditions, 195
Association
effect of ground state association on photoreduction of basic dyes by anionic *N*-phenylglycine and its neutral esters, 355

Baeyer–Villiger reactions
new Baeyer–Villiger rearrangement products in the addition of singlet oxygen to furfuryl acetate and furfuryl benzoate, 97
Benzene
energy transfer from vibrationally excited SF_6 to benzene, hexafluorobenzene, fluorobenzene and toluene, 151
Benzil crystals
photoacoustic determination of phosphorescence yields of benzil crystals, 215
Benzofurazan
radical mechanism in the photoreaction of organic *N*-oxides: an ESR observation of nitroxyl radicals from photoreaction systems involving benzofurazan *N*-oxide, 243
E-1,2-Bispyrazinylethylene
photochemical $E \rightarrow Z$ isomerization of quaternary salts of *E*-1,2-bispyrazinylethylene, 29

β-Carboline
experimental and theoretical radiative lifetimes for some β-carboline derivatives, 207
Chlorine
kinetics of the gas phase reaction of chloride atoms with a series of alkenes, alkynes and aromatic species at 295 K, 167

© Elsevier Sequoia/Printed in The Netherlands

Chlorobenzene
photoinduced electron transfer from *N,N*-dimethylaniline to chlorobenzene: the decomposition rate constant of the radical anion of chlorobenzene, 9
Chromium
photoreactivity of chromium(III) and chromium(VI)–acrylic acid systems: polymerization *vs.* decarboxylation, 249
Cinnamic acid
the quenching of *m*- methoxycinnamic acid fluorescence, 289
Collisional removal
absolute rate data for the collisional removal of Ge(4 $^3P_1$) by olefins by time-resolved atomic resonance absorption spectroscopy, 141
Cuprous chloride
the photochemical conversion of *cis, cis*-1,5-cyclooctadiene to tricyclo[3.3.0.0^{2,6}]octane sensitized by cuprous chloride: quantum yield of the seven main isomerizations involved, 39
Cyanogen
laser induced fluorescence studies of CN reactions with alkanes, alkenes and substituted aliphatic species, 177
Cyclodextrins
effect of cyclodextrin complexation on the photochemistry of *p*-methoxy-β-phenylpropiophenone, 109
Cyclohexane
the UV photolysis (λ = 254 and 185/254 nm) of cyclohexene in oxygen-saturated and oxygen-free cyclopentane solution, 49
cis,cis-1,5-Cyclooctadiene
the photochemical conversion of *cis,cis*-1,5-cyclooctadiene to tricyclo[3.3.0.0^{2,6}]octane sensitized by cuprous chloride: quantum yield of the seven main isomerizations involved, 39
Cyclopentane
the UV photolysis (λ = 254 and 185/254 nm) of cyclohexene in oxygen-saturated and oxygen-free cyclopentane solution, 49

Decarboxylation
photoreactivity of chromium(III) and chromium(VI)–acrylic acid systems: polymerization *vs.* decarboxylation, 249

Electron transfer
photoinduced electron transfer from *N,N*-dimethylaniline to chlorobenzene: the decomposition rate constant of the radical anion of chlorobenzene, 9
Energy transfer
energy transfer from vibrationally excited SF_6 to benzene, hexafluorobenzene, fluorobenzene and toluene, 151
singlet energy transfer from 1,5-diphenyl-3-(styryl)-2-pyrazoline to a disulphone magenta dye, 223
Esters
effect of ground state association on photoreduction of basic dyes by anionic *N*-phenylglycines and its neutral esters, 355
intermolecular excimer formation of *n*- acetyl-2-pyrenylalanine ethyl ester, 295
ESR
radical mechanism in the photoreaction of organic *N*-oxides: an ESR observation of nitroxyl radicals from photoreaction systems involving benzofurazan *N*-oxide, 243
Excimers
intermolecular excimer formation of *n*-acetyl-2-pyrenylalanine ethyl ester, 295
on the excimer-forming capacity of aromatic oxadiazoles: the application of polymer photophysics to the problem, 123

Fluorescein
estimation of fluorescence yields for 2′,7′-dichlorofluorescein in titanium dioxide suspensions, 325
Fumaronitrile
pressure effects on the photocycloaddition of 2-adamantanone with fumaronitrile, 17
Furfuryl compounds
new Baeyer–Villiger rearrangement products in the addition of singlet oxygen to furfuryl acetate and furfuryl benzoate, 97

Gas phase
gas phase photochemistry in round bottomed flasks, 379
Germanium
absolute rate data for the collisional removal of Ge(4 $^3P_1$) by olefins by time-resolved atomic resonance absorption spectroscopy, 141
Glycines
effect of ground state association on photoreduction of basic dyes by anionic *N*-phenylglycines and its neutral esters, 355

Heavy atom effects
heavy atom effects on geminate and free radical recombination, 1
Hydrogen peroxide
hydrogen peroxide photoproduction sensitized with rose bengal with semicarbazide as the electron source, 341

Indium oxide
photocatalytic activities of indium oxide powder prepared from indium hydroxide, 361
Isomerization
photochemical $E \rightarrow Z$ isomerization of quaternary salts of *E*-1,2-bispyrazinylethylene, 29

Luminescence
luminescence of acenannellated metallotetraazaporphins, 117

Magenta dyes
singlet energy transfer from 1,5-diphenyl-3-(styryl)-2-pyrazoline to a disulphone magenta dye, 223
Matrices
polystyrene as an inert matrix for photophysical investigations, 369
Metallotetraazaporphins
luminescence of acenannellated metallotetraazaporphins, 117

Nitrite ions
oxygen consumption in two aqueous systems: excited nitrite ions–oxygen and nitrite ions–singlet oxygen, 269
Nitrones
photochemistry of some α-(2-naphthyl)-nitrones, 65
Nitroxyl radicals
radical mechanism in the photoreaction of organic *N*-oxides: an ESR observation of nitroxyl radicals from photoreaction systems involving benzofurazan *N*-oxide, 243

OH radicals
the reactions of OH radicals with toluene diisocyanate, toluenediamine and methylenedianiline under simulated atmospheric conditions, 195
Olefins
absolute rate data for the collisional removal of Ge(4 $^3P_1$) by olefins by time-resolved atomic resonance absorption spectroscopy, 141
Oxadiazoles
on the excimer-forming capacity of aromatic oxadiazoles: the application of polymer photophysics to the problem, 123
N-Oxides
radical mechanism in the photoreaction of organic *N*-oxides: an ESR observation of nitroxyl radicals from photoreaction systems involving benzofurazan *N*-oxide, 243
Oxygen consumption
oxygen consumption in two aqueous systems: excited nitrite ions–oxygen and nitrite ions–singlet oxygen, 269

Phosphorescence
photoacoustic determination of phosphorescence yields of benzil crystals, 215
Photoacoustic methods
photoacoustic determination of phosphorescence yields of benzil crystals, 215
Photocatalysis
photocatalytic activities of indium oxide powder prepared from indium hydroxide, 361
Photochromic reactions
time-resolved resonance Raman studies of the photochromic reaction of 6-nitro-1′,3′,3′-trimethylspiro[2*H*-1-benzopyran-2,2′-indoline], 233

Photocycloaddition
pressure effects on the photocycloaddition of 2-adamantanone with fumaronitrile, 17
Photolysis
the UV photolysis (λ = 254 and 185/254 nm) of cyclohexene in oxygen-saturated and oxygen-free cyclopentane solution, 49
Photoreduction
effect of ground state association on photoreduction of basic dyes by anionic *N*-phenylglycine and its neutral esters, 355
Polymerization
photoreactivity of chromium(III) and chromium(VI)–acrylic acid systems: polymerization *vs.* decarboxylation, 249
Polymers
on the excimer-forming capacity of aromatic oxadiazoles: the application of polymer photophysics to the problem, 123
Polystyrene
polystyrene as an inert matrix for photophysical investigations, 369
Porphyrins
triplet yields of some tetraphenylporphyrins and octaethylporphyrins, 261
Pressure effects
pressure effects on the photocycloaddition of 2-adamantanone with fumaronitrile, 17
Propiophenone
effect of cyclodextrin complexation on the photochemistry of *p*-methoxy-β-phenylpropiophenone, 109
Pyrazoline
singlet energy transfer from 1,5-diphenyl-3-(styryl)-2-pyrazoline to a disulphone magenta dye, 223

Quaternary salts
photochemical $E \rightarrow Z$ isomerization of quaternary salts of *E*-1,2-bispyrazinylethylene, 29
Quenching
the fluorescence quenching mechanisms of Rhodamine 6G in concentrated ethanolic solution, 313
the quenching of *m*-methoxycinnamic acid fluorescence, 289

Radiative lifetimes
experimental and theoretical radiative lifetimes for some -carboline derivatives, 207
Radical anion
photoinduced electron transfer from *N,N*-dimethylaniline to chlorobenzene: the decomposition rate constant of the radical anion of chlorobenzene, 9
Radical recombination
heavy atom effects on geminate and free radical recombination, 1
Rhodamine 6G
the fluorescence quenching mechanisms of Rhodamine 6G in concentrated ethanolic solution, 313
Rose bengal
hydrogen peroxide photoproduction sensitized with rose bengal with semicarbazide as the electron source, 341
Round bottomed flasks
gas phase photochemistry in round bottomed flasks, 379

Semicarbazide
hydrogen peroxide photoproduction sensitized with rose bengal with semicarbazide as the electron source, 341
Sulphur hexafluoride
energy transfer from vibrationally excited SF_6 to benzene, hexafluorobenzene, fluorobenzene and toluene, 151

Time-resolved atomic resonance
absolute rate data for the collisional removal of Ge($4\ ^3P_1$) by olefins by time-resolved atomic resonance absorption spectroscopy, 141
Time-resolved resonance Raman
time-resolved resonance Raman studies of the photochromic reaction of 6-nitro-1′,3′,3′-trimethylspiro[2*H*-1-benzopyran-2,2′-indoline], 233
Titanium dioxide
estimation of fluorescence yields for

2′,7′-dichlorofluorescein in titanium dioxide suspensions, 325
Toluene
energy transfer from vibrationally excited SF_6 to benzene, hexafluorobenzene, fluorobenzene and toluene, 151
the reactions of OH radicals with toluene diisocyanate, toluenediamine and methylenedianiline under simulated atmospheric conditions, 195
Tricyclo[3.3.0.$0^{2,6}$]octane
the photochemical conversion of *cis,cis*-1,5-cyclooctadiene to tricyclo[3.3.0.$0^{2,6}$]octane sensitized by cuprous chloride: quantum yield of the seven main isomerizations involved, 39
